📍 Boeng Keng Kang 2, Phnom Penh, Cambodia

Final-year Management Information Systems student with a strong interest in backend development. I have built real projects using Java (Spring Boot) and Python (Django), where I worked on designing RESTful APIs, handling authentication, and managing databases. I have hands-on experience with MySQL, PostgreSQL, and Docker from actual project work. I enjoy writing clean code and building systems that are simple, structured, and easy to maintain.

EDUCATIONS

Bachelor of Management Information Systems 2023 - Present
Setec Institute – Phnom Penh, Cambodia
• Expected Graduation: December 2026 | GPA: 3.58/4.00

High School Diploma 2019 - 2022
Hun Sen Tbeng High School – Kampong Thom, Cambodia

ACADEMIC PROJECTS

E-COMMERCE MANAGEMENT SYSTEM

Team Project | Java (Spring Boot)

- Designed and developed RESTful APIs using Spring Boot and MySQL, with clear endpoint naming, proper HTTP methods, and consistent JSON responses
- Implemented JWT-based authentication and role-based access control to secure endpoints and manage user permissions
- Built core modules including product browsing, cart management, and order checkout

AdminLTE Dashboard

Individual Project | Python (Django)

- Built a web-based admin dashboard using Django for managing students, teachers, and subjects
- Implemented secure login and role-based access control to separate permissions between administrators and staff
- Handled full CRUD operations across multiple entities with a clean and maintainable backend structure
- Used PostgreSQL as the database and Docker to containerize the application for a consistent development environment

TECHNICAL SKILLS

Programming : Java, Python

Frameworks : Spring Boot, Django

Databases : PostgreSQL, MySQL, SQLite

Web Technologies : HTML, CSS, RESTful APIs, Vanilla JavaScript (basic)

Tools: Git, GitHub, Docker, Linux (basic command line)

LANGUAGES

Khmer : Native | **English** : Good
